

- A** Cut out the airplane template square (dotted line). Turn sheet over so printed side is face down and first folds in so letters A are together.
- B** Keeping the printed side face down, fold the three tail lines and pinch up with thumb and index fingers.

- C** Fold wings up together (Note: The tail section should stick up because of opposite fold).
- D** Now fold the wings down to finish plane. You may choose to add a paperclip to the nose section for extra stability.

Letters A together

HELPING THE AVIATION INDUSTRY GET BACK IN THE AIR IN 2021
